## DATA SOURCE: Excel

In the zip folder you just downloaded, you'll find a spreadsheet in Excel format.

This data file includes all the company and product information required to create the document automatically.

Follow this guide to fill the spreadsheet correctly with your product information.

Let's get started!

## FIELD MAPPING: Cover

The first three columns of the spreadsheet correspond to the cover information. Fill the first row of Excel with your information.

### Company logo\*

Write the name of your file (PDF, TIFF, PNG, JPG, etc.)

E.g. **Logo bianco.pdf**

### Document title

Write the title of the document.

E.g. **Lighting Catalog**

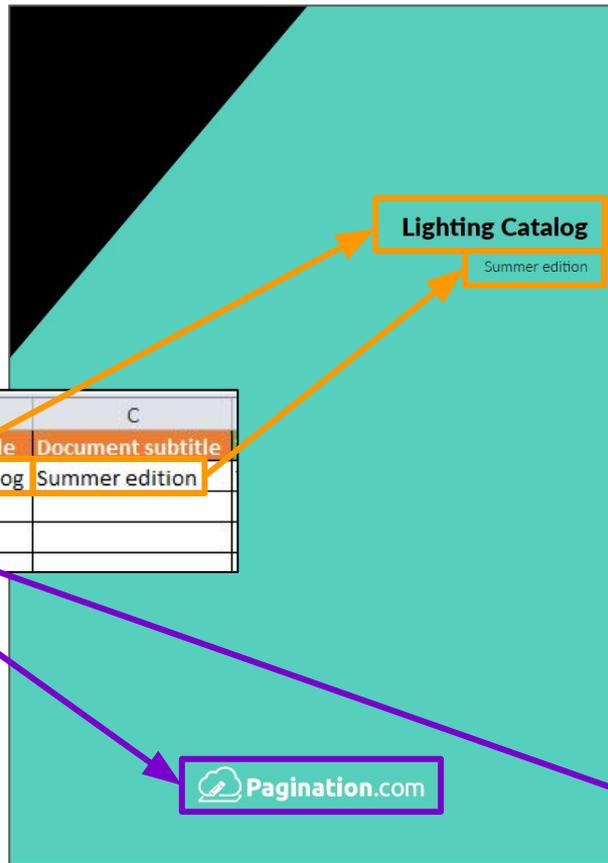

### Document subtitle

Write the subtitle of the document.

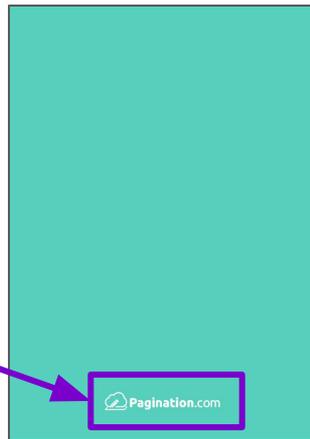

E.g. **Summer edition**

A	B	C
Company logo	Document title	Document subtitle
Logo bianco.pdf	Lighting Catalog	Summer edition

BACK COVER

*\*Keep in mind that the logo will be placed automatically only if the name you write in the spreadsheet corresponds to the name of the real logo file you uploaded to the Pagination cloud.*

## FIELD MAPPING: TOC title and Company info

### TOC Title

The green field corresponds to the name of the Table of Contents (TOC). You can name it as you like.

E.g. ***Table of Contents***

### Company info

It corresponds to the information you can insert in the footer of all the pages. You can name it however you choose. If you provide the URL of your website, we can make it clickable.

E.g. [www.pagination.com](http://www.pagination.com)

For more information about the TOC, click [here](#).

The diagram illustrates the field mapping for the TOC title and company info. It shows a TOC table and a footer table. The TOC table has a header row with 'Table of Contents' and a body with three rows: 'Electrical Goods' (3), 'Lamps' (3), and 'Other Stuff' (4). The footer table has a header row with 'TOC Title', 'Company info', and 'Category 1', and a body with three rows: 'Table of Contents', 'www.pagination.com', and 'Electrical Goods'. A green arrow points from the 'Table of Contents' header in the footer table to the 'Table of Contents' header in the TOC table. A blue arrow points from the 'www.pagination.com' cell in the footer table to the 'www.pagination.com' link in the footer of the page.

## FIELD MAPPING: Categories and TOC

**Category 1** and **Category 2** are the chapters and sub-chapters of your document. They appear in page headers and in the TOC with their commencing page numbers.

Pay attention to these fields, as the changes made here will affect both the TOC and rest of the pages.

### Category 1

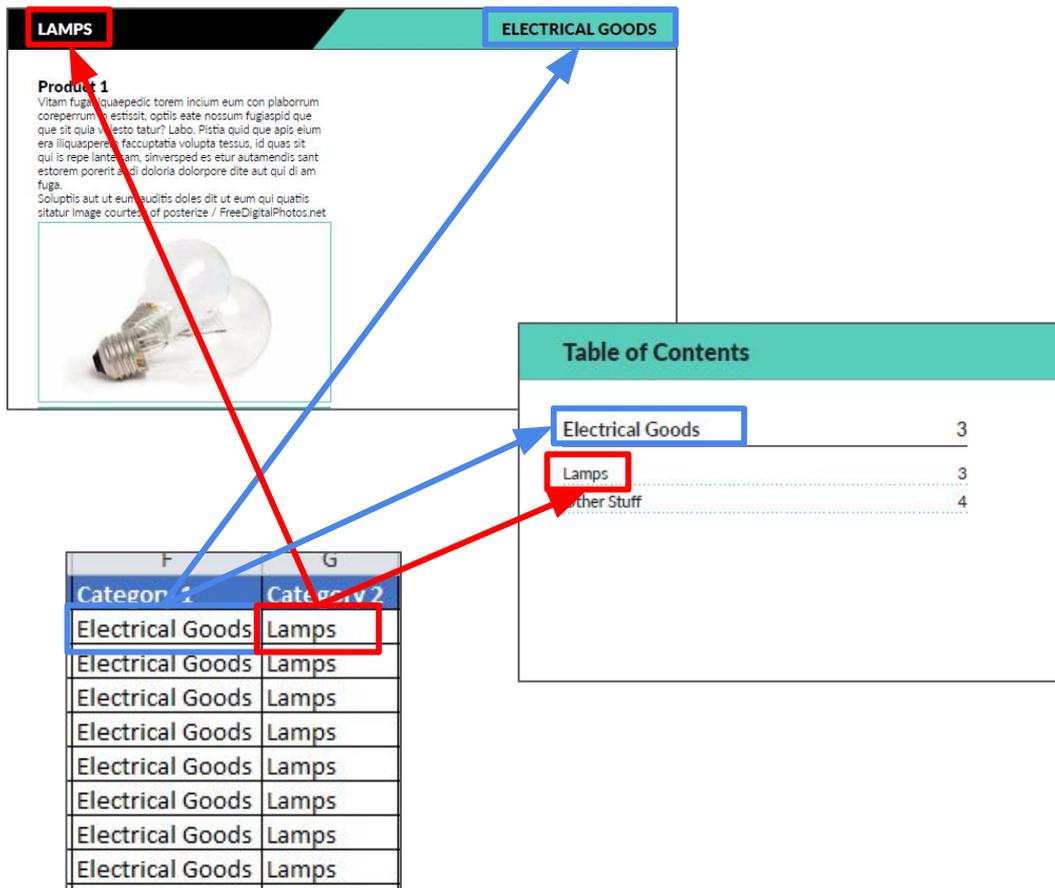

This is the main category of your document. If you have no categories, don't worry, you can leave this field blank.

E.g. **Electrical Goods**

### Category 2

This is the subcategory of your document. If you have no sub-categories, don't worry, you can leave this field blank.

E.g. **Lamps**

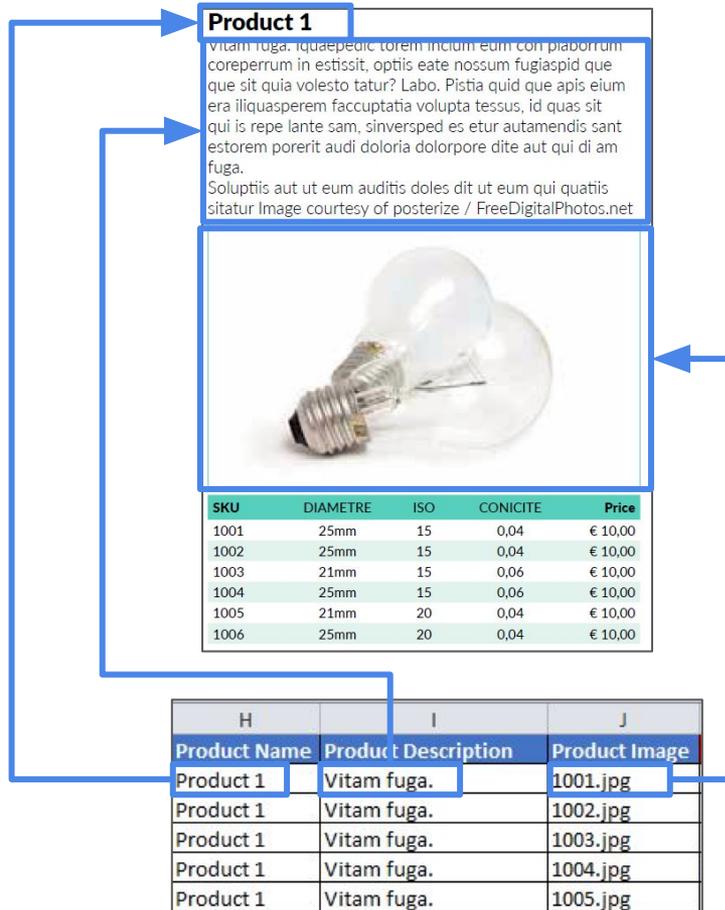

## FIELD MAPPING: Product information

The content in the **Product Name** field (e.g. *Product 1*) is associated with the title of the product layout.

The content in the **Product Description** field (e.g. *Vitam fuga...*) is associated with the description of the item.

The content in the **Product Image** field (e.g. *1001.jpg*) is associated with the image of the item.

## FEATURES: Product grouping

When you want to create a product grouping, you must use the same **Product Name** for all the **different items (SKUs)** that you want to group.

The same procedure must be repeated for the **Product Description**.

When creating a **product grouping**, only the image of the first product will be published in the document.

## FIELD MAPPING: Table

The contents of each column with a **red header** correspond to the header name in the table (the product attribute).

You can easily change the name of the product attribute simply typing a new product attribute name.

E.g. *I want to change from SKU to Part #.*

**You simply have to replace “SKU” with “Part #” in all the cells.**

The content in each column with the **blue header** corresponds to the value of a product attribute.

E.g. *25 mm*

### PLEASE NOTE:

If the cell related to a label attribute (**LabelAtt1**, **LabelAtt2**, **LabelAtt3**) or to an attribute (**Att1**, **Att2**, **Att3**) is empty, its column will not be published and the remaining space will be divided proportionally among the other columns.
